

NVIDIA CUDA-Q: Accelerating the Development of Quantum Computing

Nvidia is among the front-runners in quantum computing...its open source platform NVIDIA CUDA-Q has a lot to offer in this field.

Quantum computing is an exciting prospect with its promise of solving complex

problems at unbelievably fast speeds. Tech giants like IBM and Google are already working at developing quantum

systems that make use of qubits rather than classical bits-bytes. Table 1 lists the work that some of these companies are

Table 1: Quantum computers and systems developed by corporates

Companies	Quantum technology and type
IBM, Google, Rigetti, OQC, IQM, Quantum Circuits	Superconducting
Quantinuum, Oxford Ionics, IonQ, AQT	Trapped ion
QuEra, Pasqal, Atom Computing, Infleqtion	Neutral atom
PsiQuantum, ORCA Computing, Xanadu, Quandela	Photonic
Intel, Diraq, Quantum Motion	Silicon spin
D-Wave	Quantum annealing
Microsoft	Topological
Quantum Brilliance, XeedQ	Diamond/NV centre
Alice & Bob	Cat qubits
