

care providers to the working class and the poor, we serve a market that no one else wants to touch." And Shetty's aim is to add 20,000 hospital beds in the next five years across states. To treat the rising tide of cancer patients, the group has created a Rs 250-crore cancer hospital in association with Kiran Mazumdar Shaw of Biocon. How does the socially-inclusive model work? "We do over 10 per cent of all heart surgeries in India. So, we benefit from economies of scale," he says.

New Technology, New Prospects

Teleradiology is the electronic transmission of diagnostic scans and X-rays from one location to another to facilitate their re-

The Growth Drivers
