

An **IMPACT** Presentation

AN OVERVIEW OF STEEL SECTOR

The Indian steel industry have entered into a new development stage from 2005-06, riding high on the resurgent economy and rising demand for steel. Rapid rise in production has resulted in India becoming the 5th largest producer of steel.

The National Steel Policy has envisaged steel production to reach 110 million tonnes by 2019-20. However, based on the assessment of the current ongoing projects, both in greenfield and brownfield, Ministry of Steel has projected that the steel capacity in the country is likely to be 124.06 million tonnes by 2011-12.
