

by enhancing production capabilities of existing mines and opening up new mines - Deposit -11B in Bailadila sector and Kumaraswamy in Donimalai sector. The production capability would increase to around 50 million tonnes per year by 2014-15.

Besides, NMDC is also in the process of securing mining leases of following iron ore mines (some as JV with State Governments):

1. Sasangada Iron Ore Deposit, Jharkhand
2. Ghatkuri Mine, Jharkhand
3. Ramandurg, Karnataka
4. Deposit - 13, Bailadila, Chhattisgarh
5. Deposit-4, Bailadila, Chhattisgarh
6. Apart from iron ore NMDC is developing Magnesite mine in Jammu and Arki Lime Stone Project in Himachal Pradesh.

For Value addition NMDC is in the process of developing a 3 mtpa steel plant at Jagdalpur and 2 pellet plants at Donimalai (1.2 mtpa) and at Bacheli (2 mtpa). Besides, NMDC is also in the process of merger of Sponge Iron India Limited with plan for expansion to produce billets.

Besides iron ore, NMDC also plans to go for other minerals like Coal, Diamond, gold etc for which NMDC is looking forward for leases / buy properties from foreign countries directly / under Special Purpose Vehicle/ Joint Ventures.

For continuing the exploration activities NMDC has set a Global Exploration Centre at Raipur, Chhattisgarh.

NMDC is taking up diversification activities through its intensive R&D efforts for production of High-Tech and High Value added products from Blue Dust like Carbon free sponge iron powder, Nano crystalline powder. Besides, study is also being conducted for setting up a demonstration plant to beneficiate BHJ/BHQ material for upgradation to +64% Fe iron ore concentrate.

NMDC is also investing in development of renewable energy resources as an environment friendly investment. A Wind mill project (10.5MW capacity) has been completed & commissioned at Karnataka. It is also actively endeavoring to foray into Solar energy sector-starting with Karnataka state.

NMDC has always shown great concern for environment protection. At all its projects care is taken in this regard by tree plantation, making tailing dams/check dams at different places to arrest the out-flow of contaminating minerals.

KEY MILESTONES:

- Established on 15th November 1958 as a Government company as per the provisions of the Companies Act, NMDC has developed from being a single product (lump ore) single customer company to a multi product (lump ore, fines and calibrated lump ore), multi customer (>100) company over the years.
- NMDC in 1992-1993 disinvested 1.61% to financial institutions and in 1996-1997 disinvested 0.01% in favour of its employees. An FPO for 8.38% shares worth 33 Crore was brought out in March 2010 & it fetched around 10,000 Crore which will be with the National Development Fund of the Government of India.
- It was ranked the Best Performing PSU as per the survey carried out by the Department of Public Enterprises (DPE) for the year 2007-08 on the basis of overall performance on financial and other parameters and in 2008 it was conferred the Navaratna status enhancing the board's power to incur capital expenditure.

OVERVIEW:

- World crude steel production has witnessed an impressive growth during the last decade from the level of 850mT during the year 2001 to 1,344 mT in 2007, resulting in a CAGR of 8%. However, the world crude steel production on year to year basis has witnessed a reduction for the first time in the past decade during 2008 when production decreased by 1% to 1,330 mT from 1,344 mT in 2007. The experience of the 2008-09 recession has indicated that industries dependent on export are more susceptible to volatilities of the market.
- There is no doubt that China and India are leading the way in world crude steel production. Unlike world steel production, iron ore sea-borne trade is estimated to increase during 2009 which is mainly due to increase in demand of iron ore from China.
- In India the domestic demand of iron ore has also increased. For Indian iron ore producers, opportunity lies both in domestic & export markets.
- NMDC has proven iron ore reserve of around 200 million tonnes. The company continuously does exploration to enhance its iron ore reserves in the existing mines at Donimalai & Bailadila.
