

Rashtriya Ispat Nigam Limited Visakhapatnam Steel Plant

DELIVERING HIGH QUALITY AND COST COMPETITIVE PRODUCTS

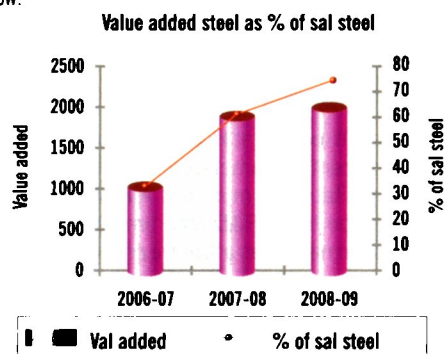

P. K. BISHNOI
CHAIRMAN CUM MANAGING DIRECTOR

Visakhapatnam Steel Plant (popularly known as "VIZAG STEEL"), whose corporate entity is 'Rashtriya Ispat Nigam Limited' (RINL), is the first shore based integrated Steel Plant in the country. The Plant with a rated capacity of **3.0 Mt** is a producer of steel products in the long category like wire rods, re-bars (VIZAG TMT), structurals (VIZAG UKKU) i.e. angles, channels, blooms and billets. RINL has got **several technological FIRSTS in the country** to its credit.

- 7 meter Tall Coke oven batteries with coke dry quenching and recovery of waste heat for power generation
- BIGGEST Sinter Plant (312 m²)
- LARGEST Blast Furnaces (3200m³) with Bell less top charging and 100% slag granulation & Gas Expansion Turbines
- Steel Melt Shop with 100% continuous casting
- Rolling Mills with 'Tempcore' and 'Stelmor' processes

RINL-VSP was the first Integrated Steel Plant to be accredited with all the three international standards certificates, namely, ISO 9001:2000, ISO 14001:1996 and OHSAS 18001:1999 and the first steel plant to be ISO certified for its Finance division.

Though the plant was basically designed to produce mild steel grades, innovative in-house process improvements in the manufacturing processes have enabled RINL-VSP to continuously develop value added products to improve the bottom line as shown below:

Cutting edge technology and growth plans:

RINL has drawn its long term directional plans to expand the capacity of liquid steel to 16 Mt in phases by 2020. The first phase in which it would be doubling its capacity currently under advanced stage of execution. The new units are set to come on stream by 2010 & 2011. The new facilities and technological features coming up are:

- Blast Furnace (3800 m³) with state-of-art technology
- Steel Melting Shop with **secondary steel melting facilities, electro magnetic stirrer, auto mould level control, combined blowing.**
- Sinter Plant (408 m²) with circular cooler.
- **High speed Wire Rod Mill** with wide range of products.
- Special Bar Mill with **flexibility to supply in straight and coil form.**

• Structural Mill with high speed roughing stands

RINL is also in the process of upgrading its capacities through revamping of existing assets like Blast Furnaces, Converters, Sinter Plant and other associated facilities.

'Enterprise Resource Planning' (ERP) -'UKKU SANKALP' (Steely Resolve) implementation process started in RINL-VSP to integrate business processes which in turn improve internal efficiencies.

Joint Venture initiatives

RINL-VSP has been very actively exploring various options to ensure its raw material security through acquisition / JV route. Some initiatives in this direction are:

JV with MOIL: RINL-VSP has formed a joint venture company with Manganese Ore India Ltd.-RINMOIL Ferro Alloys Pvt Ltd. to meet RINL-VSP's ferro alloy requirement besides opportunity to export. The company was incorporated on 29.07.09.

BIRD group of companies: Acquisition of BIRD Group of companies as part of the restructuring of BIRD group by RINL was approved in the Union Cabinet meeting held on 10.09.09. In the proposed restructuring, OMDC and BSLC will be made subsidiaries of EIL, which in turn will be made **subsidiary** of RINL, thus bringing EIL, OMDC and BSLC under the umbrella of RINL. This alliance would be of mutual benefit.

ICVL: RINL is also pursuing coal assets overseas through International Coal Ventures Ltd (ICVL) which was formed with equity participation by NMDC, CIL, NTPC, SAIL & RINL to acquire metallurgical and thermal coal assets overseas. ICVL was incorporated on 20.05.09.

RINL – A responsible Corporate Citizen:

RINL-CSR activities focus on sustained development and inclusive growth of the surrounding community and some of the major focus areas include Peripheral Development, Education, Medical & Health, People care, Sports & Cultural Efflorescence and Help during Natural calamities.

To propagate use of steel in rural areas, RINL-VSP has adopted seven villages in the periphery to develop them as model steel villages, where steel intensive buildings for community halls, Panchayat office, solar lighting facilities etc are taken up. Construction of steel bus shelters and distribution of steel bullock carts to farmers are some other steps taken in this direction. RINL has implemented innovative scheme-'Jaladhara' to supply drinking water to tribal belts of Visakhapatnam district. RINL-VSP has taken up construction of School buildings, provision of school furniture, play equipment, computers etc in high schools, schools in SC/ST colonies & tribal ashram schools. RINL-VSP has been conducting various medical camps, De-addiction programmes, Child immunization, AIDS awareness campaigns, support to "Sankar Foundation" (renowned Eye Hospital), medical help during natural calamities and disasters etc.

ACCOLADES:

RINL-VSP's operational efficiency and overall excellence has won the company many accolades like the Prime Minister's Trophy for best integrated steel plant twice and the first Steel Minister's Trophy. Also the company has been recognized by CII for Significant Achievement in its journey towards Excellence. Some major recent awards are:

- Recognised as 'India's best companies to work for' by the study conducted by Great Place To Work Institute and Economic Times.
- Capability Maturity Model integrated' (CMMI) level-3 certificate by 'Software Engineering Institute (SEI), USA - First Indian Steel Plant to achieve this.
- Energy efficient Unit' award conferred by CII.
- Indira Gandhi Rajabhasha Puraskar for its outstanding contribution in the implementation of official language.
- Gold and Bronze medals for RINL-VSP's employees at 'International Convention on Quality Control Circles' conventions at Philippines.
