

ENABLING TRANSFORMATION THROUGH TECHNOLOGY

“India is the innovation engine for the globe”

JOHN CHAMBERS CHAIRMAN AND CEO, CISCO

REUBEN SINGH/www.indiatodayimages.com

I want to share with you what we see on a global stage, but at the heart of it is how the Internet is really transforming businesses, changing healthcare, changing lives, determining which countries go ahead in the global economies and, perhaps, which ones fall behind. Change is great when it happens to somebody else, but when it happens to us we feel uncomfortable. Yet countries, companies or individuals who do not change will get left behind in the most rapid transition that has ever occurred in our lifetime. I have been an optimist on the economy for the last 12 months on a global basis. In terms of globalisation, I think it is a force that is inevitable; it is going to move with a new

CHAMBERS ADDRESSING THE AUDIENCE

speed; we call it the 'new normal'. I think India is very uniquely positioned to lead in that market. It is capable of using technology to accomplish social goals, change healthcare and education forever. I believe that India is not just the workforce for the future, but for the globe. It is also the innovation engine. How you do that would be an example to your peer countries around the world.

CISCO does well to catch market transitions. We stay very close to our employees. We are in every country in the world and we are number one in India. We catch transitions and
