

DRESSED TO THRILL

If your child has a keen eye for fashion, trends and a love for all things fabulous, then fashion designing might just be his calling.

Fashion designing is one course that can never be out of faFashion designing is one course that can never be out of fashion. Though a definite study is yet to be made to estimate its growth, it is a well-acknowledged fact that the fashion industry in

India is growing by leaps and bounds. Contrary to the common belief, fashion today is not just about sketching designs and organising shows. With scores of functional areas to choose from, joining this sector holds the key to a career where innovation and creativity only helps your child achieve one milestone after the other.

A course in fashion designing offers tools, techniques and skills for developing knowledge of make-up, hair styling, photography, computer and IT applications. Such a varied exposure and extensive training ensures that students do not have limited options. From fashion houses and advertising firms to event management companies and even films, sky is the only limit for them. A brief look at the various options in the fashion industry.
