

THE GREAT REVIVAL

With their vision and dynamism, engineering professionals are rediscovering Brand India.

If your child is among those who can boast of shining bright in basic sciences and mathematics and out-of-the-box thinking is his/her forte, then engineering can be a rewarding option. However, it is a vast discipline, and there is a lot for an aspiring engineer to choose from. A look at some of the prominent branches of engineering.

■ ELIGIBILITY

Basic school education with science stream, necessary knowledge of physics, chemistry and mathematics

■ JOB PROSPECTS AND INSTITUTES

Aerospace Engineering

While aeronautical engineering is concerned with aircraft, helicopter and related activities, aerospace engineering concerns itself with satellites, launch vehicles, space systems and missiles. It is the study

of flying vehicles operating within and outside of the earth's atmosphere.

Academy of Aerospace and Aviation, Indore, www.aaaindore.com

Computer Science

The global meltdown may have been a bane for the industry, but in the long run it still remains your ticket to good money.

IIT (Chennai, Delhi, Kharagpur, Mumbai, Roorkee, Kanpur, Guwahati), [www.iit\(m/d/kgp/b/r/k/g\)ac.in](http://www.iit(m/d/kgp/b/r/k/g)ac.in)

Communication Engineering

Electronics and Communications Engineering has a key place in the field of information technology, electrical, operations and communications systems.

Delhi College of Engineering, New Delhi, www.dce.edu

Petroleum Engineering

With new offshore sites being discovered, the demand for petroleum engineers has gone up tremendously.

School of Petroleum Technology, Gandhinagar, www.iptg.ac.in

Nuclear Technology

Nuclear technology plays a pivotal role as the demand for power is expanding and innovative means of utilising fuel are being developed.

Bhabha Atomic Research Centre, Mumbai, www.barc.ernet.in

Electrical Engineering

Despite being one of the oldest streams in engineering, it is still a much desired and sufficiently lucrative arena.

National Institute of Technology, Calicut www.nitc.ac.in

Some other areas are bioengineering, agricultural engineering, nanotechnology, materials and metallurgy, marine and clinical.

■ COST OF PROGRAMME

Today - Rs 3, 00,000-12, 00,000 per year (depending on the area in which one chooses to pursue the degree and the college)

15 years later - Rs 24 lakh approx
