

MALE BOX

MEN OCCUPY an enclosure set apart for women at a rally in Delhi by the Jat community of north India seeking their inclusion in the list of Other Backward Classes. Apparently, reservation didn't work for women at the venue.

MUMBAI TOPS THE LIST OF E-WASTE GENERATING CITIES IN INDIA, CHURNING OUT 11,000 TONNES EVERY YEAR.

MUMBAI | Waste Land

Mumbai can lay claim to another first and it's nothing to be proud of. The economic capital is now also the country's e-waste capital. A survey by the Central Pollution Control Board (CPCB) reveals that Mumbai tops the list of electronic and hazardous waste-producing Indian cities. The report says there are 36,165 hazardous waste-generating industries in the country. Topping the list are Mumbai, Delhi, Bangalore, Kolkata, Chennai, Ahmedabad, Hyderabad, Pune, Surat and Nagpur. The board has predicted the country's annual e-waste production to increase eight-fold from 1,46,180 tonnes in 2005 to 8 lakh tonnes by 2012. "Mumbai generates over 3.43 lakh tonnes of hazardous waste and 11,000 tonnes of e-waste per annum," says B.P. Shukla, senior environmental engineer and in-charge, Hazardous Waste Division, CPCB. What an utter waste of the maximum city. *by Harsha Bhat*
