

HE DOESN'T DRIVE A TRUCK. HE DRIVES THE INDIAN ECONOMY.

The small truck owner is truly the unsung hero of India's economy.

Tirelessly transporting goods from one point to another, he plays a critical role in maintaining supply chains, facilitating exports and sustaining the economy.

Ironically, for a role so vital, the vehicle he uses - the truck, in many cases, is more than 15 years old.

Though a newer truck will help him achieve higher efficiencies, he is unable to upgrade as he has no access to institutional credit.

This denial of organized credit to the truck owner is hampering the replacement of the old trucks on Indian roads.

At Shriram, we have been working hard to correct this. In the last 30 years, we have helped replace nearly 2 million trucks by providing affordable acquisition credit (about Rs. 28,000 crores) to the truck owners. Thus freeing them from the clutches of the unorganized sector and in the process, speeding up the modernization of the national truck fleet.

That's not all. We will be soon launching 3 new initiatives that will provide organized trading facilities to the truck

owner for the first time ever and motivate him to replace his old truck even faster.

- **SHRIRAM AUTOMALL** - Commercial vehicles can be traded here through a transparent sales process, thus eliminating the broker, will be set up in 50 locations across India.

- **ONE STOP** - A computerized touch-screen kiosk that will provide real-time information about trucks available for sale, will be set up in all our 500 branches.

- **NEWLOOK** - Old trucks will be refurbished and sold under this new brand name, with their commercial value enhanced.

But this is still not enough. The modernization of our national fleet is a task that demands a concerted collaborative effort by every stakeholder.

To create a momentum for this national initiative, we need a massive mobilization of public opinion. Each one of us can play a part in this. So if you too believe that a younger fleet is in national interest, just log on to **www.okhornplease.com** and blow the horn. We owe it to the Indian truck owner.

Safe upkeep & maintenance, price discovery through a transparent sales process, clear title, insurance & finance for old trucks.

Computerized touch screen kiosks provide instant information on trucks for sale.

The brand name for refurbished old trucks put up for sale.

A NATIONAL INTEREST INITIATIVE BY
