

# HUBS OF FORTUNE

Some are getting up; others stay hit by the recession. A primer on the cities that are the favoured destinations of job-seekers.

## ▼ MUMBAI

**Moderately down**

Entertainment up, media remains affected, financial services yet to pick up. Reversal of downward trend in business services; construction sector has bottomed out.

## ▼ DELHI

**Significantly down**

Media and business services have taken a big hit. Retail has not recovered yet; financial services and construction sector see some upturn.

## ▲ BANGALORE

**Moderately up**

Employment in IT picks up again; retail sector remains adversely affected as players don't add new stores. Business services continue to do well.

## ▲ KOLKATA

**Moderately up**

Signs of revival in the manufacturing and IT. However, business services remain down and media continues to remain adversely affected due to the slowdown.

## ▲ CHENNAI

**Significantly up**

Manufacturing and IT are both up significantly, slight improvement in retail and financial services. Situation may improve in the next couple of quarters.

## ▲ PUNE

**Strongly up**

Movement from Mumbai to Pune has strengthened due to better infrastructure. IT and manufacturing are strongly up as economy looks up. Construction is hiring again.

## ▼ HYDERABAD

**Strongly down**

Political uncertainty has forced some companies to put plans on hold. IT, manufacturing, infrastructure and construction are all down.

## ▲ AHMEDABAD

**Strongly up**

Manufacturing sector, business services, media and transport sector all see a strong uptrend as new investments continue to flow into Gujarat.

dustry this year. Revamping the country's infrastructure will kick off a virtuous cycle of employment-led economic growth. Ten years ago, the construction industry was not even organised, but now it's emerging as a sunrise sector. Over the next five years, the cumulative demand in the residential sector will be about 75.43 lakh units, says Cushman & Wakefield.

From unskilled site workers to highly skilled talent like engineers, foremen, crane operators, project managers and architects, this sector is expected to explode with new jobs. Says Abhishek Lodha of the Lodha Group: "We are looking at overseas talent. Apart from that we are going to source most of our manpower needs from engineering and management institutes."

## EDUCATION, TRAINING AND CONSULTANCY

**Total Employee Base: 97,15,000**

**New Jobs: 83,000**

India has the largest student population in the world with 13.5 crore children in primary schools. And this large body of students needs educational infrastructure and teaching staff. But the country faces a shortage of at least two lakh schools. In order to meet the demand, a host of new private schools are coming up across India. As with any sector, education is also witnessing traction as it looks set to be opened up. Be it for vocational training, professional training or coaching, there's already a surge in allied activities around education, especially by the private sector. With the Government seeking to
