WITH URBAN MARKETS GETTING SATURATED, COMPANIES ARE PENETRATING RURAL INDIA

working on it will stand to gain. Telecom companies are already importing talent from Europe and Japan because 2G will soon be history and people who understand 3G and its applications will be hot property.

If you don't want to be caught in the wrong job, choose your industry with care so that you are relevant even a decade later. Forget about a career for life because hot jobs and sectors come with their own set of benefits. So get on to the gravy train before it stops. Also, people working in sought-after sectors enjoy better perks and salaries, so not only does that put you in the thick of action but ensures good money as well.

Will mobile applications grow faster than the IT business? Is a KPO job better than a marketing job with a fast moving consumer goods company? We tell you all. Here's a lowdown on what skill-sets will be in demand in times to come and what they pay.

RESEARCH ANALYTICS

The world's largest companies are queuing up in India to understand why
