

How Stem Cells Can Save You

JANUARY 25, 2010

Cutting edge research in India is already helping patients with eye defects, heart diseases, strokes and spinal injuries. What the future holds.

“The Government's seriousness in backing research into stem cells and the cautious optimism of doctors and researchers is a good sign, one that can lead to a scientific renaissance in India.”

G. SWAMINATHAN, *Coimbatore*

A Time to Heal

Indian expertise in biometrics, genetic code analysis, transcription, lab test analysis, diagnostics and telemedicine is widely acknowledged (“How Stem Cells Can Save You”, January 25). The reason behind the phenomenal success of stem cell therapy is the fact that it offers hope to millions of patients afflicted with chronic or acute diseases not responding to conventional treatment. There are risks, unknowns and prejudices against stem cell therapy, but for the greater good of medicine and humanity, the time has come to rise above these fears.

DR VITULL K. GUPTA, *Bathinda*

With its promise to cure a variety of disorders and illnesses, the potential of stem cell research is sim-

Turnaround Triumph

Kerala has set an example by turning the majority of its loss-making public sector undertakings (psus) into profit-generating ones (“Turning the Tide”, January 25). A professional approach in running such establishments is the key to success. Increasing productivity through daily monitoring and cost-cutting exercises worked magic.

V.K. TANGRI, *Dehradun*

Kerala's experiment with the PSUs reminds one of the historic Burnpur agreement between SAIL and the five national trade unions which paved the way for the recovery of its subsidiary IISCO in West Bengal. It proves that contrary to popular perception, the unions will back any management plan to revive a company provided it meets the expectations of both sides.

Y.G. CHOUKSEY, *Pune*

ply mind-boggling. Liver, kidney, cardiac and pancreatic malfunctions can now be easily and effectively tackled. People can expect to live longer with this unique biological repair system. Its potential must be tapped fully.

K.V. RAGHURAM, *Wayanad*

Eastern Moves

With a friendly Sheikh Hasina in power in Bangladesh we have lesser reasons to worry about the eastern front than ever (“Eastern Entente”, January 25). Thanks to her leadership and her determination not to entertain any hostile anti-India campaigns, some of the militant outfits of the North-east are facing the heat. Such co-operation in anti-terrorist operations should be welcomed. We should also
