

REFINED BEAST

Under the hood lies a 2.2 L Direct Injection Common Rail Engine (DICOR) that's fitted with a variable geometry turbo charger to deliver 120 PS of power and 250 Nm of torque. Along with an optimised gear ratio that ensures better torque at low speeds making sure that driving in the city is a breeze.

SMALL TURNING CIRCLE RADIUS

The Grande MK II has a surprisingly small car like turning circle radius of 5.25 m.

A FORTRESS ON WHEELS

The Grande MK II comes equipped with safety features like superior braking, side impact bars, a collapsible steering column and an engine immobiliser. The optimised suspension cushions all kinds of road shocks and offers minimum roll while cornering, so your ride is comfortable and safer.
