

THE MOST PROMISING SCHOOLS OF INDIA

Post Independence India has made rapid strides in virtually every sector of the economy. Education sector for instance has made tremendous progress over the years. This is no mean achievement given the fact that India has 22% of the global population. It's been a herculean task to ensure that elementary schooling is made available to each and every child across the country. But despite the odds, today India boasts of some of the finest educational institutes, not just in Asia, but as good as anywhere in the world.

It is pivotal for the growth of any country, to have a strong foundation for its young children and youth. It's important to have a school which offers a potent mix of traditional as well modern education, a school which will prepare the good citizen of tomorrow.

India Today has planned an exclusive feature to highlight the key role as well as achievements of some of the most promising schools in the country. The endeavour is to provide an opportunity for its readers to get up-close with the finest schools and help them make a right choice.

This feature will bring together, the leading schools which have carved a niche by way of providing world class educational facilities, innovative and result oriented educational methods.

The Asian School COMMITTED TO EXCELLENCE

The Asian School spread over 15 acres, shone on the firmament of quality education exactly 9 years ago the school literally walked the red carpet over night. The Academic building is an imposing structure with residential areas set amidst greenery with student being provided their own recreational area.

A housemaster, tutors and a matron live with students housed in three separate hostels – one each for junior boys, senior boys and girls. The hostels are so located that the senior boys do not have easy access to the girls' hostels. A 25 metre swimming pool, auditorium, table tennis, badminton halls, three large sports fields, dinning hall, activity rooms and a gymnasium provide activity-based experiences and leisure pursuits for the children in their spare time. Conscious efforts are made to inculcate the reading habit and develop communication skills. In the middle section (VI to VIII) teachers integrate

technology into the learning process. In the senior section (IX to XII) the focus is on achieving 'excellent results' at the board's examination.

The Asian School reckoned for its academic excellence also boasts of an enviable position in most inter-school contests of cricket, football, basket ball and athletics to name a few, being seeded amongst the best three in each.

Understandably, our students have been faring well in as varied fields as Modelling, Fashion Designing, Management, Engineering and Medicine.

Mr. A.K. Das, who has served as House Tutor, The Doon School and Deputy Head Master and Officiating Head Master, The Lawrence School, Lovedale, Ootaomnd and presently the Principal, The Asian School maintains 'This is not a school but an institution'. No wonder the school, in a short period of 9 years, has earned a proud position among the best 75 schools in the country.
