

OPG World School SCHOOL WHICH MOULDS GLOBAL CITIZENS

Education sans a school is like an aimless flowing stream that has no set path or purpose. A school helps in channelising the ideas, thoughts and efforts so as to derive the utility value just like a dam in hydel project. Edward de Bono's lateral thinking is the mantra followed at OPG. Every child thinks differently and reacts to a situation differently too. OPG World School does not believe in a 'judgmental approach' to every action of the child. Instead, it has evolved with a well defined curriculum with unique teaching practices that encourages the child to learn at his or her own pace to retain it for a lifetime. The result is that every child goes on to grow into a young adult with multiple skill sets, thus emerge with flying colours as a responsible global citizen with age old Indian values.

OPG Mission: To enhance the skill sets of students to the highest level of competence and thereby make the world an emancipated and enlightened place. It endeavours to provide facilities and learning environment beyond compare in moulding Global Citizens.

Message from the Chairman: "As a child, I always wondered what made Gandhiji leave his profession and do social work. I know the answer now. It is the voice of the conscience. I heard it too one day. It was then that OPG World School was born. It gives me immense satisfaction to see hundreds of children walking into the portal to learn - Satish Chandra, Chairman.

Built for Knowledge: The campus is scientifically planned, artistically

designed and precisely constructed help groom the global citizens. The School has made a conscious decision to take in half the number of students it is designed for, to ensure quality teaching and not quantity. OPG has a unique student adoption programme under which a senior teacher adopts a few students for guidance; learning and motivation. Periodical examinations and tests are conducted to lay a strong foundation that helps in confidence building and better understanding of the subjects. OPG has established a full-fledged technology center with latest systems with broadband Internet connectivity. In addition to a modern Computer Lab, OPG has a Language Lab for students to hone their communication skills. OPG has a full fledged Library- Media centre that houses a wide range of meticulously selected collection of books, journals, magazines, periodicals, newspapers and interactive CD's. Practical classes in all the branches of science - Physics, Chemistry and Life Science as well Mathematics are conducted in specifically designed laboratories for this purpose. The school has an exclusive Model Workshop, where the students can prepare their exhibits, under the guidance of an expert for Intra School and Inter School presentations. At OPG the facilities provided for sports, both indoor and outdoor, are exemplary and of high standards.

The World is a Stage: At OPG World School, students are made members of various clubs like: Health and Safety Awareness club, Eco Club, Heritage Club, Quiz club, Literacy Club, Cultural Club, Dramatics Club and Food and Nutrition Club. OPG has a centrally air-conditioned auditorium with modern audio-visual equipment that is the venue for music, plays, annual cultural and literary fests. At OPG World School arrangements are in place to provide the children breakfast, lunch and evening snacks where a dietician decides on the weekly menu chart.

OPG awaits you!

Genesis Global School EVOLVING CREATIVE MINDS

How many adults does it take to bring up one child who is morally upright and academically successful? There is no single answer. Yet, there is enough positive evidence showing that the school plays a very major role. Genesis Global School has arrived with a single minded objective of delivering higher standards in education and integrates all three areas of resources - human expertise, infrastructure & technology.

Genesis Global School is committed to promote education of a child through emphasis on intellectual, emotional and social growth. The school encourages students to be active learners promoting conceptual understanding of the curriculum. True to its name, it aims to churn out well-rounded individuals with a global perspective, cross-cultural awareness and understanding of international issues. If global education is a choice parents want their child to explore, Genesis has collaborations with Clifton College- UK and L'Ermitage International School of France, which provide requisite international exposure right from point zero with a choice of international certifications besides the regular national curriculum.

The school nurtures an ideal educational environment for the future global citizen by offering a rich variety of activities and equal opportunities for a multidimensional growth. It encourages an inquisitive mind and offers avenues for expressing their creativity and building their skills. Olympic standards are maintained in all sports facilities, to nurture the legends of

tomorrow.

To meet its social responsibilities and develop a sense of accountability and conscientiousness in its students, the school inculcates a love for the environment by implementing water harvesting and recycling. Environment friendly materials have been used in the making and construction of the 23 acre campus.

Besides the regular day scholar and boarding options, Genesis Global School has also innovated new boarding alternatives like the 5 day hostel (weekends with parents), especially warranted when both parents have a demanding career.
