

Surveying so many schools in the NCR, especially with the 'International School' label can be an exercise. They all look the same. But when one seriously dwells into the depth of mission, vision, curriculatruth begins to reveal itself. One such example is the Scottish High International School situated in the millennium city of Gurgaon.

the clan student form a close bonding for the entire tenure of the child in the school.

This five year young school has risen fast to be amongst the top known schools in the country. The school was awarded all national and international affiliations in a record time and is perhaps the first and only school in the country to be certified in ISO 9001, ISO 14001 and OHSAS 18001 --- all under one roof.

A teacher- student ratio of 1:12, a strict cap on only 25 students in a class and a highly qualified faculty help the deliverance of such varied curricula. Mrs Sudha Goyal, Principal, has more than two decades of experience in leading CBSE, ICSE, IGCSE & IB curriculum in various boarding & day boarding schools across the country.

A long day boarding till 4:30 pm enables justice to co-curricular activities. 18 outdoor and indoor activities are covered by dedicated coaches and trainers including archery, swimming, horse riding, taekwondo, in addition to soccer, judo, tennis, gymnastics, skating, cricket etc.

The lobby showcases are spilling with trophies and medals won by the Scottish 'Highlanders', as they are called in various national and international

competitions. The notice boards show a proud display of newspaper cuttings of accolades achieved in national skating, international tennis & cricket, state equestrian, soccer, taekwondo & skating ----- the list is endless.

As one walks out of the gate amidst some of the children doing the obstacle course while others cheering their Clan soccer match in their clan uniforms, one feels like one is in a different world - a world of next generation schooling.

Kartikay Saini
Chairman
Scottish High International School.

“ We at Scottish believe in the 'next gen schooling'. The whole concept of the way we bring up our children has evolutionised, so why not the educational institutes and by that I mean not only the methodology of teaching but everything! We don't believe in doing anything in half measures and that's the reason we are a day boarding school because I don't believe in compromising. And that's also the reason why we give equal emphasis & time to every aspect of education and co-curricular activities and not squeeze it in a shorter time frame.”
