

Dr. Sanjay Chugh

■ LATEST DEADDICTION STRATEGIES-

ALCOHOL DEPENDENCE and ADDICTION TO DRUGS such as Opiates including Heroin, Smack or Brown Sugar, Opium, Cough Syrups, Proxyvon, Spasmoproxyvon, Fortwin, Morphine and Tidigesic injections are dreaded problems worldwide. The addicted individual dreads going in for Detoxification because of the prolonged & intense discomfort experienced during withdrawal. With ACCELERATED OR ULTRARAPID DETOXIFICATION UNDER LIGHT SEDATION, without using General Anaesthesia, the entire procedure is NOW OVER IN A FEW HOURS! In a RADICAL IMPROVEMENT IN RELAPSE PREVENTION, medicinal pellets are IMPLANTED UNDER THE SKIN THROUGH MINOR SURGERY. These MAKE RELAPSE ALMOST IMPOSSIBLE. The efficacy of different pellets can last from THREE TO TWELVE MONTHS. It avoids the need to supervise administration of oral medicine, makes it impossible to 'forget' taking tablets and ELIMINATES CRAVING. Thousands of addicts

for the smile you always wanted
