

MOST PROMISING SCHOOLS

STEPPING STONES FOR A BRIGHT FUTURE

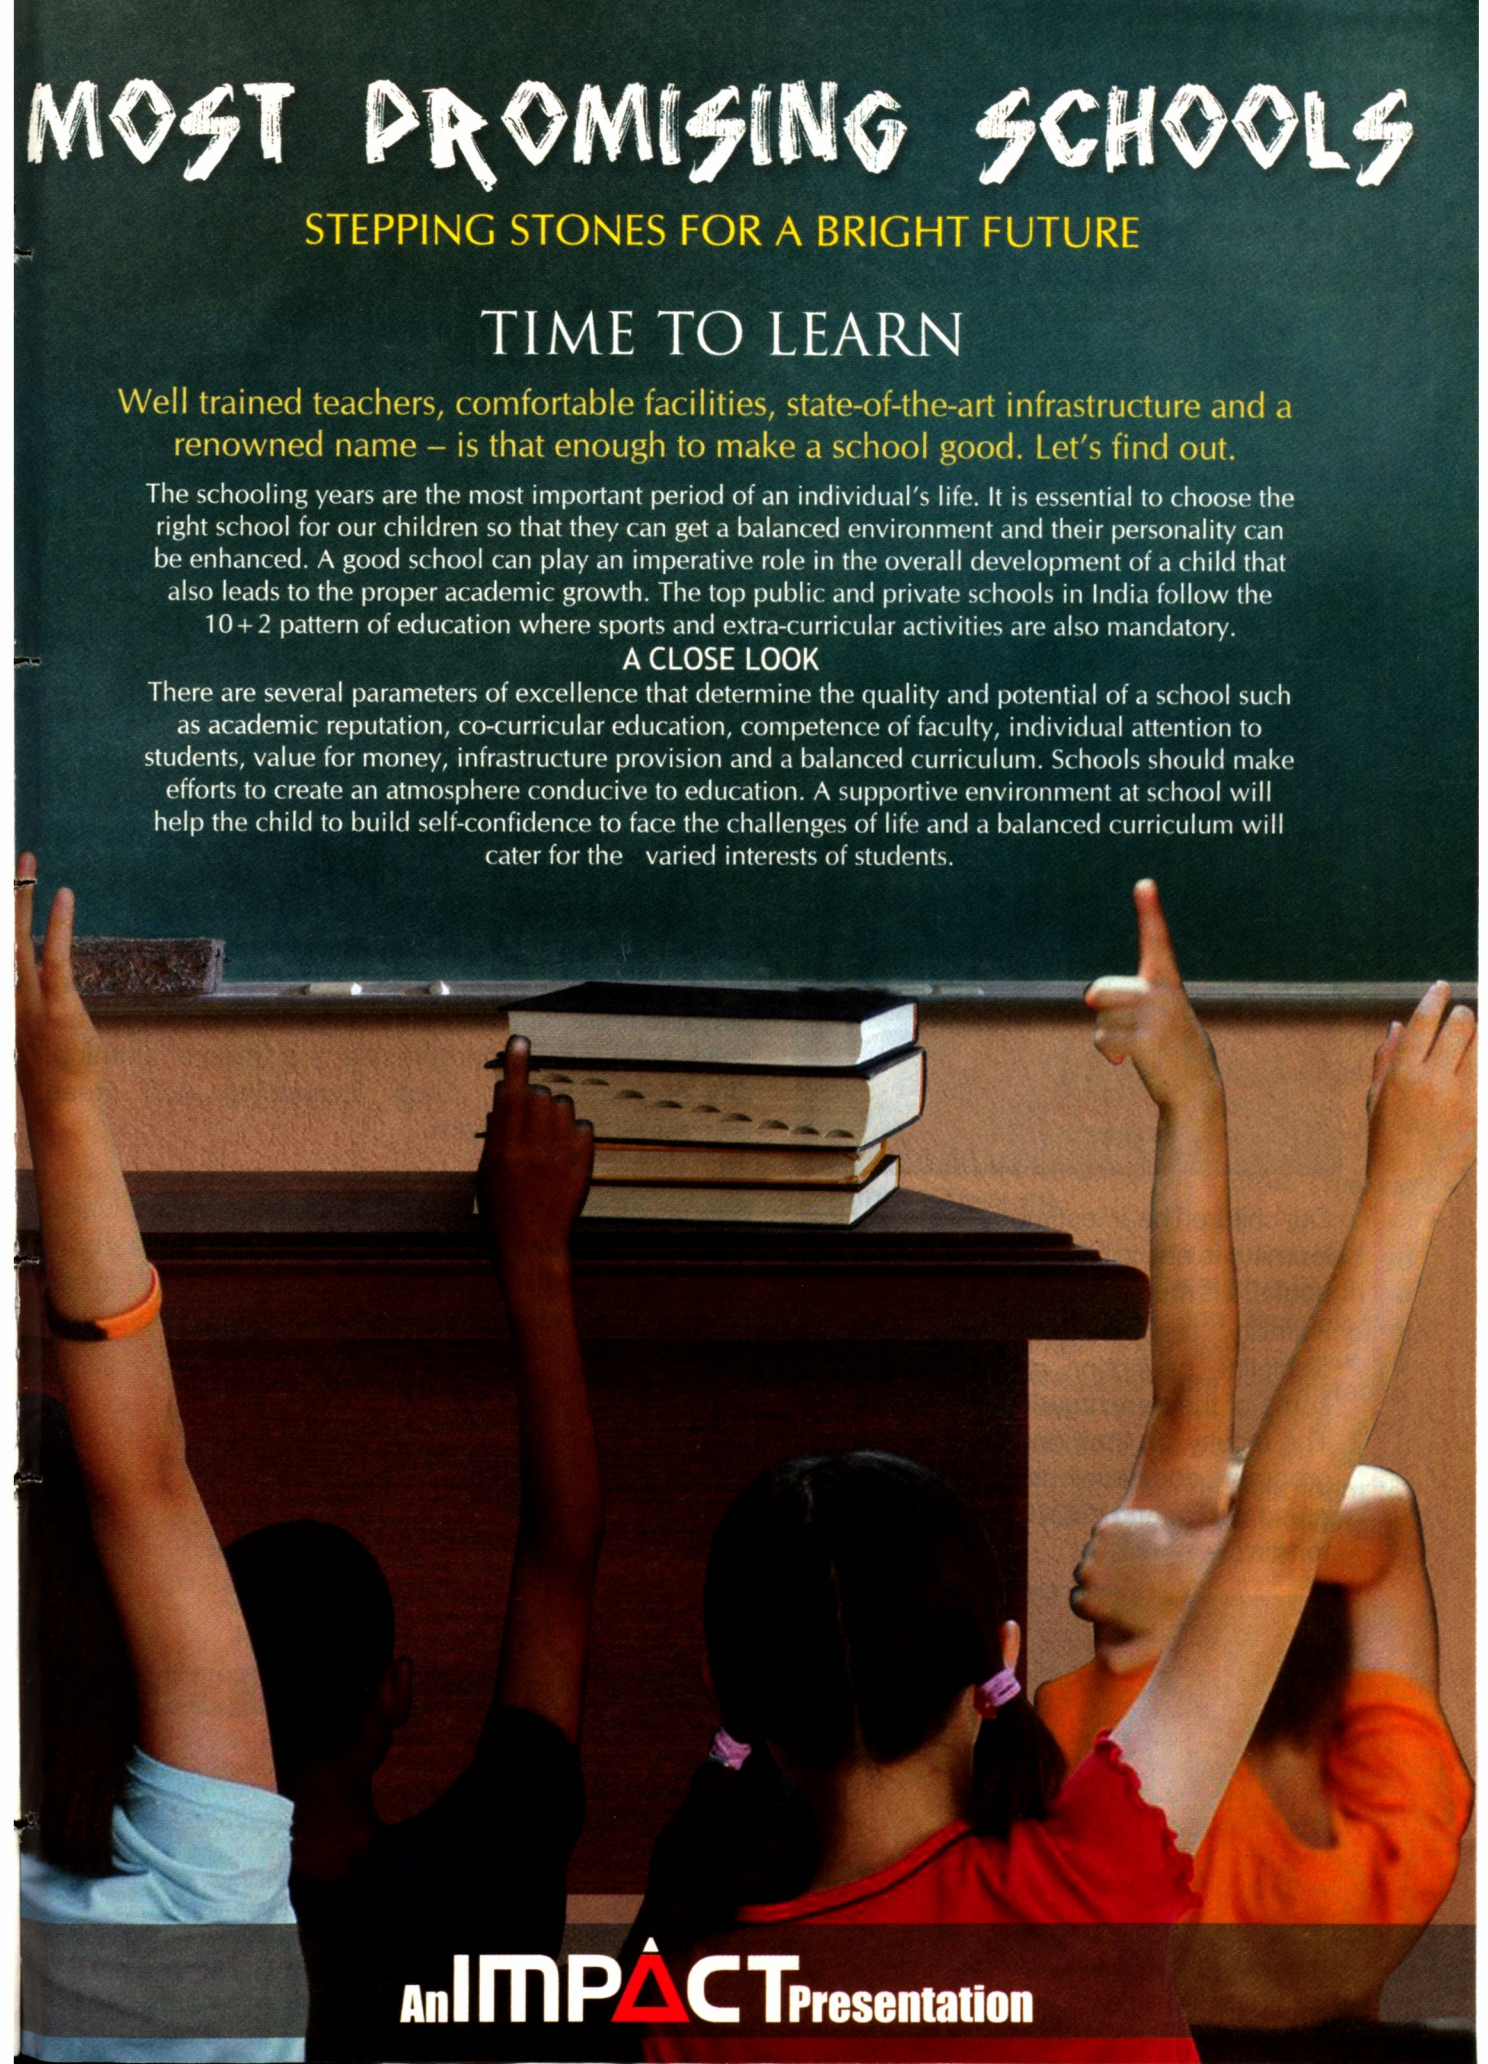

TIME TO LEARN

Well trained teachers, comfortable facilities, state-of-the-art infrastructure and a renowned name – is that enough to make a school good. Let's find out.

The schooling years are the most important period of an individual's life. It is essential to choose the right school for our children so that they can get a balanced environment and their personality can be enhanced. A good school can play an imperative role in the overall development of a child that also leads to the proper academic growth. The top public and private schools in India follow the 10+2 pattern of education where sports and extra-curricular activities are also mandatory.

A CLOSE LOOK

There are several parameters of excellence that determine the quality and potential of a school such as academic reputation, co-curricular education, competence of faculty, individual attention to students, value for money, infrastructure provision and a balanced curriculum. Schools should make efforts to create an atmosphere conducive to education. A supportive environment at school will help the child to build self-confidence to face the challenges of life and a balanced curriculum will cater for the varied interests of students.
