

SUCCESS STORY OF INDRAPRASTHA SCHOOLS

...to light a lamp that will illuminate the whole world with its wisdom, create a pool of learning that will never dry up and paint a canvas that will portray the world in its sublime grandeur.

Dr. RAJESH HASSIJA

Recipient of National Teacher's Award
Privileged Member of Asia's Who is Who

I strongly believe that to train a man in mind and not in morals is to add a menace to society. The one and only answer to all our problems is imparting wholesome 'Education' which prepares for life rather than for a profession. The entire object of quality education is to make people not merely do the right thing, but enjoy the right things; not to instruct, but to inspire; not to merely learn, but to acquire knowledge; not to limit thought, but to expand the frontiers of the mind. **Indraprastha** Schools impart value-based education, maintaining the equilibrium between academics and co-curricular activities. We endeavour to navigate through the perilous path of modern day education without ignoring our rich culture. The meticulously designed curriculum provides space to children to recognize their innate potential and realize the vision of excellence in every venture. The literate of the 21st century focus not only on the learning of the 3R's – Reading, wRiting, aRithmetic – but also on learning, unlearning and relearning.

Indraprastha with its motto 'Teach Each Child, Develop Whole Child' aims at creating life long learners who emerge as winners conquering milieu of challenges in the backdrop of the highly competitive global scenario. An aura of positivity and confidence is created by etching the 'You-can-do-it' attitude deeply and firmly on their young, impressionable minds, with utmost love and care. At Indraprastha, each child is a budding star, being prepared to touch the infinite sky with a sound conviction that HE SHOULD, HE COULD AND HE MUST!

It is evident from the performance flow of the Class XII batch of 2009, which did exceptionally well not only in their Board Exams but also in all the competitive exams they appeared for.

Jigyasa Sahu is pursuing her MBBS from Vardhaman Medical College at Safdarjung Hospital in New Delhi.

Tarang Chugh is doing his B.Tech in Information Technology from the Indian Institute of Information Technology.

Abhinav Sikri is now pursuing Engineering in Information Technology at the Netaji Subhash Institute of Technology.

Varun Kohli has cleared both his DPMT and AFMC. He is doing his MBBS from

UCMS, GTB hospital, Delhi.

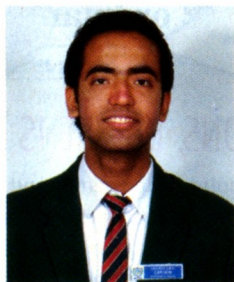

Indraprastha Schools have excelled not only in the academic field. In the sporting arena, the students have been winning accolades for themselves in both international and national events. The school Rope Jumping Competition Team has been selected to go to Japan. In the national events, Shabnam Kerketta of Class IX, gave the school a proud moment when she represented Delhi at the National Level Throwball Tournament held at Goa. She bagged the Second position.

'Let learning be a joy and teaching a pleasure' - is the key to our success. Children here are taught lessons not for a day, instead they learn which bridges to cross and which to burn, as they steadily tread the path to success, fulfilment and happiness, indulging in the process of self-improvement and celebrating life in every activity, be it scholastic or non-scholastic. We endeavour to Transform learning for Transforming lives.

**"Following the course of our calling,
Soaring on the wings of our action,
Let's move ahead, Let's stride ahead
To create a new history!"**
