

The success story

Amway started as a dream of two friends from Ada, Michigan USA who wanted to have a business of their own. And after 50 golden years, their hunger for success led to what Amway has grown to be – a commitment spread over **80 countries, 450 products, 600 patents and more than 3 million ABOs.**

But what has made these 50 years special is not the passage of days and years but the unremitting work theory of Amway “What is right never varies, but breathes many lives”. Such essentials of Amway have never changed. In fact, they have only become stronger over the past 50 years.
