

More than a decade of success in India

Over the years, Amway has become the largest Direct Selling FMCG Company in India, selling **110 products** with **5,00,000 active distributors**. And what an incredible journey it has been. The business has swiftly evolved into **130 offices**, **70 warehouses** and an annual turnover of **approx. Rs 1,400 crores** for the period **Jan-Dec. 2009**.

As the Amway family was growing, the Braille project came into being. This helped Amway India to enable more than 45,000 blind children to read and learn through Braille material. A long road lies ahead. But along comes wonderful memories.
