SURVEY RANKS

GALGOTIAS BUSINESS SCHOOL

**AMONG TOP
B-SCHOOLS IN INDIA**

**The B-School
where excellence
is the watch word**

Galgotias Business School is rubbing shoulders with the best in the industry. To be exact, with the best 24 B-Schools in India. Sure, it is the faculty, industry interface, infrastructure, entrepreneurship program, adaptability to rapidly changing scenarios and infrastructural strength of this elite institution that has scored highly on the survey scale. The team of specialists along with the special jury of Zee Business conducted the survey under the expert guidance of the President of research team, Mr.B.Narayanswami. Going into the details of the survey, he informed that a random sample of 500 participants which included faculty, recruiters, aspiring students and young MBA professionals was surveyed against 10 parameters, these being overall placements, global placements, international internship, global faculty, student exchange program, industry interface, faculty-both international & visiting, course content, research & publication and infrastructure. The result of the survey shows IIMs Ahmedabad, Bangalore and Calcutta at the top three positions. He also mentioned that there are some deserving entrants in the list of the best 24 B-Schools in India according to this survey.

And among these, Galgotias Business School reserves a commendable position for itself.

Sharing his views on this prestigious survey, Mr.Bakul Dholakia, an

eminent personality from IIM Ahmedabad, told that the first ten positions see the same names as the last year survey because these institutions have fast caught up with not just the industry requirements but that of the world at large. New courses are added to the curriculum that have direct bearing on making of a fully aware and committed professional. The IIMs have a brand image that they've build over many years most painstaking and responsibly.

The new B-Schools that have made it to this list certainly have the intellectual capital and pedagogy that is needed to create excellent business leaders. Their disciplined approach to education, highly accomplished faculty and the ability to foresee trends are putting them at par with the best.

Indeed, this survey mirrors the hard work and sincerity put in by Galgotias Business School. The intense passion with which this institution is empowering minds and imparting quality education in a well-structured environment has caught the eye of the surveyors who are seeing emergence of a new generation of innovative thinkers from the stimulating campus of GBS.

This coveted honour is preceded by the historic OPEN C-core survey conducted across five domains which were further categorised into sub-parameters, majorly being Intellectual Capital, Placement Performance, Industry Interface, Infrastructure & Facilities and International Linkages.

Also Recruitment Satisfaction Survey was conducted wherein the recruiters were asked to rate the graduates of the B-schools they were familiar with against six parameters, namely: effectiveness in application of knowledge of subject, analytical skills, communication and presentation skills, creativity, proactive attitude and ability to work in a team.

Besides rating the institutions on the given parameters, the survey team evaluated the domains as well as gave its opinions on the weightage. Faculty, alumni and recruiter ratings were asked to generate a composite scorecard and rank for each institute on the basis of weights given by the faculty. This proved to be a historic moment for Galgotias Business School as it was rated among the top colleges for 100% placements!

This has got the huge campus all charged up with high volts of excitement and enthusiasm as Galgotia Educational Institutes (GEI) is basking in this glory and also for being awarded the prestigious Academic Excellence Award 2008-09 for 'Best Academic Infrastructure & Faculty' by Hon'ble Former Union
