

Minister of State of Home Affairs, Shri Sriprakash Jaiswal.

Indeed, GBS has received these accolades and adulation because it firmly believes that a great institution has to be part and parcel of its students dreams and aspirations and the career plan it charts out for them should intellectually stimulate them, instil in them the drive and passion to exceed their potential and go beyond the limits.

Suneel Galgotia, Chairman, GEI, says, "Our students are a perfect combination of management skills, presentability and communication skills. We teach our students to grapple with and adapt to business problems. Beyond classroom teaching helps them grow their personality. The lessons of life that they learn here come handy in day to day business functions. Of course, when it comes to placements, we enjoy top recall."

Neetu Sinha, a final year student of PGDM shares with us his views, "The fact that we are surrounded by people driven by a vision of academic excellence makes the campus a fertile ground for great ideas. Infrastructure, faculty, courses, international affiliations, industry interface and placements are par excellence at GBS."

Here's a fine fraternity of academicians, researchers and professionals with rich research and managerial experience contributing to the institute's academic excellence. Part-time and Visiting faculty also enrich the quality of the core courses and electives offered to the students. Their involvement in industry makes their teaching very relevant. Research work, MDP's, FDP's are the core requirement of GBS and it provides a major interface with the wider academic and business world. The faculty's focus is on putting students through a series of activities that go beyond curriculum to develop in them creative problem solving ability. Innovative teaching and trend spotting is a way of life here.

Keeping pace with the market requirements, the Corporate Resource Centre stays in collaboration with the corporate world. Students are empowered through guest lecture series, corporate seminars, industrial tours, corporate talks and interactive sessions with the corporate heads.

The school encourages aspiring entrepreneurs to pursue their business plans. From the current academic session a **new course in Family Business & Entrepreneurship** has been launched. An **MOU with National Entrepreneurship Network** has been signed and GBS is also in close partnership with CII. Special entrepreneurship programs are organized from

Suneel Galgotia, Chairman, GEI

time to time to help the students inculcate these skills.

Sure, these well-read, articulate and industry-ready MBAs are proud of the Galgotia lineage. These men and women blessed with long term vision and integrity owe their success to the meticulous mentoring. When it comes to placements, GEI enjoy top recall. The institutes have attracted 44 companies for Engineering & Technology students and as many as 45 companies such as ICICI Prudential, Jaypee Infrastructure, Vodafone, HDFC Bank, Bajaj Capital and India Bulls for Management students.

Every institution certainly needs a few distinguished leaders at its helm to take it in the right direction. GBS's Board of Governors includes S.B. Budhiraja, former Managing Director of Indian Oil Corporation and Executive Director of MDI Gurgaon. Dr. Pritam Singh Padma Shri, former Director, IIM, Lucknow; Executive Director, MDI and Board Member of RBI is the Vice Chairman. Led by the vision and guidance of such luminaries GBS has become a highly appreciated icon of professional learning that keeps itself ahead of the times by constant curriculum updating, using advanced tools and methods of learning & emphasising on analytical thinking and PR management.
