

Mastermind India

APRIL 26, 2010

Twenty innovators who are changing our lives.

“These incredible inventors have proven that India is second to none in terms of creativity and innovation. With more and more individuals acquiring academic excellence, such possibilities are indeed endless.”

K.V. RAGHURAM, *Wayanad*

Minds Over Matter

Enhancing India's low investment in research and development is an integral part of its progress and prosperity ("Mastermind India", April 26). Besides, we need enabling technologies with their novel products that have the greatest impact on poverty alleviation, population control, literacy and an improved law and order situation, where quality politicians with innovative policies can drive India towards self-reliance. Inventing India beyond material innovations is essential for us becoming a truly global leader.

DR SANJIV GUPTA,
Perth, Australia

I read the cover story with great interest. There are

Not in the Same League

It was clear from the start that Shashi Tharoor, a man famous for airing his views online, was not cut out for politics ("Mr Misfit", April 26). His involvement in the Indian Premier League (IPL) and all the shady deals therein, however, only serve to cast doubt over his credibility. He would do well to distance himself from all those who are making easy and unaccounted-for money from the great Indian cricket show.

DR PUNEET MADHOK, *Bhavnagar*

The entry of big money into the cricket has turned the entire exercise into a mockery. The profligacy called the IPL is a hyped *tamasha*, out to ruin the glorious game of cricket. The pandemonium over Tharoor's involvement is a sad episode. Irrespective of whatever explanation he offers, he stands responsible for the IPL Kochi controversy.

D. VINOD, *Ahmedabad*

many unsung heroes who invest their own money in many useful things. Though we have organisations like the National Innovation Foundation that encourage innovation, their efforts are meagre in a vast country like ours. I suggest an innovation fund be created with support from private industrial giants like the Tatas, Birlas, Mahindra, Infosys, Wipro, etc. Such a fund will help needy inventors fructify their inventions.

A. JAGADEESH, *Nellore*

Your cover story presenting 20 innovators who are changing our lives made for interesting reading. There may be many more. But unfortunately many of them fail to make good on commercial production for want of investment. And some of the innovations
