

Play The Style Leader

Shirt Maketh The Man

The shirt is more than just a tunic on your body. It is the first piece of garment that announces your arrival, be it at work, an evening out, at a formal dinner, at the club or on holiday. And to make the best impression at any or all these occasions, it is important that you choose the right shirt to wear — be it with a jacket or just with your trousers.

Park Avenue's extensive shirt collection for the summer has been created keeping your style and comfort in mind. From the sleek patterns of the Business range to the metallic hues of the Evening collection and to the fine linen and pastels for leisure wear,

Park Avenue offers a wide range of shirts for every occasion. Of course, shirts are not just about style and colour. It is also vital that they make you feel good in them. This aspect has been the underlying factor in every innovation that Park Avenue has infused in the new collection. The **Cotton XLA** shirts are made from a fabric which features unique comfort stretch properties, the **Anti-UV** range guards your body from harmful UV Rays. The **Non-iron** and **Wrinkle-free** shirts keep you looking crisp all day long and the anti-microbial finish along with the anti-odour properties in the **Crystalline** shirts leaves you odour free and feeling fresh all the time.

Life is all about how you Play The Lead. And shirts do have an essential role in achieving this ambition. And no one understands it better than **Park Avenue**.
