

DRESSING FOR SUCCESS

➤ How do you nail that job by donning the right look? **Park Avenue** shows you that dressing right is half the battle won

When being interviewed for a job, how you look is just as vital as those all-important credentials in your CV. But make sure to get those shirt and tie combinations right and don't forget the all important accessories that seal the deal.

COLOURS AND PATTERNS FOR THE WORKING MAN'S SHIRT:

SOLID COLOURS: Solids are the way to go when choosing the ideal work shirt. Classics like white and blue are the perfect hues, while others like light pink, lemon yellow, and lavender are great options as well.

STRIPED SHIRTS: Conveying a sense of business, a striped shirt is ideal for the workplace. Make sure that the stripes are a different size from those on the suit or tie.

CHECKERED SHIRTS: Checks are a great alternative to stripes, but make sure the checks are minimal and subtle like the micro-checkes shirts offered by **Park Avenue**.
