

HOW TO PAIR YOUR SHIRTS WITH TIES AND TROUSERS

SOLID-COLOURED SHIRTS:

Light tan, soft blue, and light yellow shirts can be easily worn with subtle patterned ties.

Co-ordinate colours that visually complement each other.

For example, wear a navy blue tie with a pink shirt.

A slim tie like the ones **Park Avenue** is offering this season, works best on a solid coloured shirt.

STRIPED SHIRTS:

To match your tie, look at your shirt from far away and determine the pronounced colour and match your tie accordingly.

A yellow tie with a blue-striped shirt works well.

CHECKERED SHIRT:

A diagonally striped tie worn with a checkered

shirt is a classic pairing.

A boxed or dotted pattern on the tie that is smaller than the checks on the shirt works well.

The colour of your shirt should always be lighter than that of your trousers. For example, A light pastel blue shirt will work well with a pair of dark blue trousers.

Avoid wearing a striped shirt with a striped pair of trousers as they will clash irrespective of how fine the

stripe on the shirt is. The same goes with checks.

As a thumb rule, your shoes and belts should always be of the exact same shade and finish. This means that black patent leather shoes go with a black patent leather belt.

COMPLETE THE LOOK:

A good pair of cufflinks will add that extra special touch to your overall look. So make sure to make cufflinks a vital part of your accessory collection.
