

Panasonic leads the way... with 'eco ideas'.

In order to make life, societies and the Planet happy,
Panasonic Group is working on three 'eco ideas' with a passion that covers the globe.

'eco ideas' for products

Making more energy-efficient products
with unique technology

'eco ideas' for manufacturing

Improved productivity to reduce CO₂ emission
from factories

'eco ideas' for everybody, everywhere

Cooperation with local communities to spread
environmental activities

'eco ideas' factory in Pilzen (Czech Republic)

As well as adopting strict environmental criteria in the
manufacturing process, employees support local
students to study environmental initiatives.

'eco ideas' activities in India

Panasonic is introducing its environmental initiatives and
latest energy efficient products in "Eco caravan" road shows
in Kolkata, Chennai, Mumbai and Delhi. Also, Panasonic
supports environmental education for school children.

'eco ideas' factory in Biwako (Japan)

Employees and their families cooperate with the local
community to provide environmental education
to students and clean up rivers nearby.
