

CRACK OPEN ONE OF THE MOST NUTRITIOUS MEALS IN THE WORLD.

(NOT TO MENTION THE CHEAPEST.)

Isn't it ironic that the cheapest meal can give your body the most benefits? Like 6 gms of the highest quality protein and 14 key nutrients.

In fact, eggs have even more protein, more kcal of energy than milk, mutton and fish. There's more. Eggs are also a good source of choline, that improves memory. And carotenoid, that prevents the degeneration of the eye cells keeping vision clear and sharp. ***It's time you cracked open good health.***
