The small things in life delight me. Simple pleasures like playing with grandchildren, going for a healthy morning walk and cooking for the family. Till a few years back I did it all.

With age, arthritis started hurting my knees and the smallest movement became painful. Initially I managed with conservative treatment, until it became severe. I led a compromised life, till I met a Joint Replacement Specialist and on his advice decided to undergo Joint Replacement. Today I play daily with my granddaughter in the park and lead a normal life. I am independent, once again.

If you are suffering from knee or hip pain due to arthritis, you need not suffer in silence anymore.

Joint Replacement is one of the many options for arthritis treatment. It may not be suitable for all, so consult a Joint Replacement Specialist to know what's right for you.
