

ARJUN TANK

Second batch of 124 Arjuns to be ordered. Development of Arjun Mark2 cleared. Future Main Battle Tank in development.

AKASH MISSILE

Two squadrons ordered by the Indian Air Force. The army to order four regiments. Akash-2 development to start.

KAVERI ENGINE

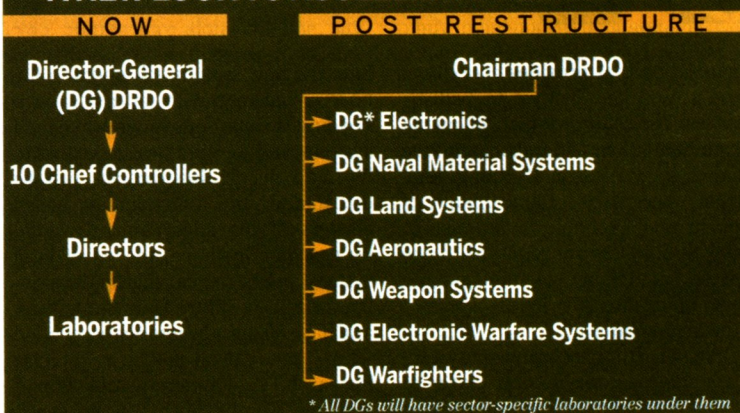

The development of the Kaveri engine programme to continue. This indigenously built engine will eventually power the Light Combat Aircraft, Tejas.

ARJUN TANKS DURING TRIALS AT MAHAJAN FIRING RANGES IN RAJASTHAN IN MARCH

The armed forces say they resort to imports because the DRDO and the PSUs are unable to deliver on time. Fifteen years ago, the DRDO agreed to develop secure communication links between the IAF jets and ground stations. Last year, after not getting even a prototype, the IAF pulled the plug on the project and floated a requirement for importing the systems. "They promise us the moon but don't even get us to the tree-tops," fumes a senior IAF official.

This month, the Ministry of Defence initiated a long-delayed series of reforms to address the concerns of the armed forces and restructure the

A NEW LOOK TO ACCELERATE DELIVERANCE

* All DGs will have sector-specific laboratories under them
