

# VELS UNIVERSITY

## - Education Redefined

**N**ot many educational institutions can claim to offer Pre Kindergarten to PhD Education under one roof. With 15 educational institutions under its umbrella, Vels Group of Institutions offers studies in diverse disciplines, ranging from nautical science to management studies. Led by one of the city's youngest educationalist, the group's vision is to transform aspiring young minds through education.

Dr. Ishari K Ganesh, the Founder Chairman of Vels Group of Institutions and Chancellor of Vels University has a contrarian's approach to education. He believes that the very essence of education is to "draw out" rather than to just 'pour in' knowledge through mindless hours of lectures in the classroom. In effect, the curriculum and the pedagogy at Vels lay emphasis on practical training, contemporary relevance and one which suits to the needs of the Industry.

Vels University approved by the Ministry of Human Resource Development ( MHRD ) and the University Grants Commission (U.G.C) in June 2008 was inaugurated on 24th September, 2008 by his Excellency Shri. Surjit Singh Barnala, Governor of Tamilnadu.

Vels University is one of the few private Universities in India to provide courses on a diverse range of subjects. The students here have the benefit of contemporary education through a host of professional and non-professional courses.

Vels University is involved in major fields of study including Engineering, Management Studies, Pharmacy, Physiotherapy, Maritime Studies, Hotel & Catering, Mass Communication, Commerce and Computing Sciences.

Foresight has helped the Vels Group to make rapid strides in its growth to an University. When the demand for the Pharmacy

education started growing in 1992 it started Vels College of Pharmacy in a rented place in Mylapore with just 32 students. Today the Group of Institutions has a student strength in excess of 15,000. Vels School of Maritime Studies was started in the year 1998. The first institution in the private sector to offer the course in India, with the USP of its own ship to impart training.

The quest to impart wider education was not restricted to disciplines alone, but also across generations and hence the group decided to get involved in the education of school and pre-school children as well.

Vels lay emphasis on research with a separate directorate to take care of research grant for funding from UGC, DIT, DBT, BRNS, DST, TNSCST, INDO EUROPEAN, INDO GERMAN, INDO ROMANIAN. Also research projects from UGC & DIT to the tune of Rs. 90 Lakhs have been received so far. Vels University is recognised as a research organisation by Scientific and Industrial Research Organisations (SIROs) by DSIR (11/499/09-TU-V Dated 27.08.09). Tie-ups have been made with other research institutions and industries to create knowledge resource centres.

With a motto of 'Knowledge is Power', the University sees education as just one aspect of individual development, and aims for the all round growth of its students. Modern teaching aids, Wi-Fi enabled campus, e-library, sports and recreational facilities are directed at improving social and physical growth of its students.

Dr. Ganesh sees a more important role for Vels in the development of the country and the youth. "Our Vision is to participate in the establishment of vibrant and modern India where the youth will be free from illiteracy and unemployment", he says. "They will be internationally competitive and fit into knowledge based societies with discipline, a National Outlook and Religious Tolerance".
