

30%* off your industrial plant's energy bill is just the beginning.

Imagine what we could do for the rest of your enterprise.

Managing the complex operating environment of industrial plants is no small task. With mounting energy costs and increased environmental regulations, maintaining throughput, minimizing downtime, and hitting your efficiency targets is more challenging than ever. Schneider Electric™ has the solution: EcoStruxure™ energy management architecture, for maximized operating performance and productivity, with new levels of energy efficiency. Today the industrial plant floor, tomorrow the entire enterprise.

Energy savings for the plant floor and beyond

Today, only EcoStruxure architecture can deliver up to 30 percent energy savings to your industrial plant, and beyond...to the data centres and buildings of your entire enterprise. Saving up to 30 percent of an industrial plant's energy is a great beginning, and thanks to EcoStruxure energy management architecture, the savings don't have to end there.

EcoStruxure™

Active Energy Management™
architecture from Power Plant to Plug™

Buildings

Intelligent integration of security, power, lighting, electrical distribution, fire safety, HVAC, IT, and telecommunications across the enterprise allows for reduced training, operating, maintenance, and energy costs.

Data centres

From the rack to the row to the room to the building, energy use and availability of these interconnected environments are closely monitored and adjusted in real time.

Industrial plant

Open standard protocols allow for system-wide management of automated processes with minimized downtime, increased throughput, and maximized energy efficiency.
