Active Energy Management™
architecture from Power Plant to Plug™

Data centres

From the rack to the row to the room to the building, energy use and availability of these interconnected environments are closely monitored and adjusted in real time.

Industrial plant

Open standard protocols allow for system-wide management of automated processes with minimized downtime, increased throughput, and maximized energy efficiency.

Buildings

Intelligent integration of security, power, lighting, electrical distribution, fire safety, HVAC, IT, and telecommunications across the enterprise allows for reduced training, operating, maintenance, and energy costs.
