

30%* off your data centre's energy bill is just the beginning.

Imagine what we could do for the rest of your enterprise.

Saving up to 30 percent of your data centre's energy bill is no small feat, and as energy prices continue to climb, every watt of energy you save matters. But data centres don't operate in a vacuum; they support and are supported by systems—process, HVAC, and security, to name a few—that also require vast amounts of power.

Enterprise-wide energy savings

Today, only EcoStruxure™ energy management architecture by Schneider Electric™ can deliver up to 30 percent energy savings to your data centre, and beyond...to the entire enterprise. Reducing data centre energy costs by up to 30 percent is a great beginning, and thanks to EcoStruxure energy management architecture, the savings don't have to end there.

EcoStruxure™

Active Energy Management™
architecture from Power Plant to Plug™

Industrial plant

Open standard protocols allow for system-wide management of automated processes with minimized downtime, increased throughput, and maximized energy efficiency.

Buildings

Intelligent integration of security, power, lighting, electrical distribution, fire safety, HVAC, IT, and telecommunications across the enterprise allows for reduced training, operating, maintenance, and energy costs.

Data centres

From the rack to the row to the room to the building, energy use and availability of these interconnected environments are closely monitored and adjusted in real time.
