REACH THE SKIES

A GUIDE TO LEADING INSTITUTES

Education is increasingly becoming the primary determinant of overall development in the emerging knowledge economy in India. In the past 5-7 years, India has seen tremendous growth by the spread and arrival of new institutes, with private entrepreneurs joining hands with universities setup by the government. These institutions which are offering professional courses in various streams are empowering the nation with a generation which is ready to take on the world to make it a Knowledge Superpower.

Today Universities / Institutes have also come up very aggressively in spread of quality education through private partnership to offer widespread reach to various professional and academic courses. These Universities / Institutes are not only offering quality education at par with any national level institution but they are also helping so many parents and children to realise their career goals and to attain quality life.

The next few pages are all about looking beyond the traditional colleges and universities. There are private colleges who are imparting quality education in their respective fields. Maybe your sky lies there...Read on.

An **IMPACT** Presentation
