

PDM Religious & Educational Association, which took birth in 1995, has come a long way in establishing itself as one of the best groups in North India having no substantial segment untouched as far as education is concerned. Now the group stands tall with PDM Polytechnic, PDM College of Engineering, PDM Public School, PDM College of Pharmacy, PDM Institute of Engineering & Technology and PDM School of Pharmacy at Karsindhu, Safidon (Jind), PDM College of Education & Ultra modern PDM Dental College & Research Institute & PDM General Hospital and PDM College of Engineering for Women. Today it is a well established group managing various educational institutions spread over 45 acres of land in absolutely pollution free surroundings.

The most important aspect of PDM's philosophy is to emphasize on self learning. The role of PDM in classroom learning is meant primarily for theoretical and conceptual inputs.

Combining lectures with group learning, real life case studies and hands on exercises consolidates classroom learning further. Group learning is used as an effective vehicle preparing prospective Technocrats, Engineers, Managers, Pharmacists and Doctors to be adept in seeking and acquiring knowledge.

PDM has developed this learning methodology into a prominent component of its educational policy. It is based on the assumption that peer group learning is very effective. Free exchange of ideas among members of each group through discussions and presentations conserves time and effort and also enhances learning and communication skills. The Association has achieved astounding success in the field of education in a short span of time and it plans to add new educational courses every year so that quality education in every field becomes available under one roof for the convenience of the students.

WHERE SUCCESS STORIES ARE WRITTEN DAILY

ALGOL SCHOOL OF MANAGEMENT AND TECHNOLOGY

LEAP TOWARDS A BRIGHT FUTURE

With thousands of Management Colleges mushrooming across the country, there was an immediate need for a program which could create a differentiation for the students in the job market. Keeping this in mind, Algol School of Management and Technology (ASMT) launched its Industry Integrated Management Programs in the regular mode.

Algol School of Management and Technology as an institution came into existence in the year 2007 and is promoted and managed by the Algol Research Foundation Trust, a well known name in the field of education consultancy. The Industry Integrated Management Programs offered by the institute is a landmark achievement in the field of management education and is different from the regular Management Programs. The Programs offered are a blend of theory and practice with equal emphasis on building the theoretical backbone backed by equal amount of industry exposure.

We at Algol believe that no individual can ever

become a management expert in the classroom alone. Keeping this belief in perspective, our industry integrated management programs are designed in a fashion wherein apart from classroom delivery, students necessarily undergo hands-on training with top corporate houses five days in a week. The training is conducted under the close guidance of an internal guide from the institute and an external guide from the corporate house. It is aimed at preparing our students to meet the future challenges of the corporate world and also helps them remove the fresher tag. Students at Algol undergoing the Industry Integrated MBA Program would additionally also receive the Post Graduate Diploma in International Business (PGDIB) and those undergoing the Industry Integrated BBA Program would simultaneously also receive the Graduate Diploma in International Business (GDIB). For additional information on the institute and its programs please feel free to visit us on www.algolworld.com.
