

Heart to heart with

**The Adviosr, Prof B.K. Gupta
formerly Principal MNREC (now MNNIT),
& Vice President J.K. Group**

What is the most advanced element of RKG Group?

Apart from a faculty of brilliance, the amount of care that has gone into the development of facilities and human resources has started giving returns.

Our graduates are now turning into very successful entrepreneurs, for example

- Gaurav Mishra, founder CEO of Media Redefined
- Sumit Agrawal, founder and CEO of Sharnam Infotech
- Shantanu Singh, founder and CEO of Chakpak
- Prakhar Mishra joined Teach for India to satisfy his intense desire to serve the masses.

What are the other dimensions of RKG Group?

An important dimension of the Group is to encourage faculty to excel in whatever they do, for example

- Dr. Rakesh Dube authored two books- Mathematics for Engineers: Vol I and Vol II, published by Alpha Science International, Oxford, U.K.

- Dr. B.K. Gupta, Dr. Meenakshi Bajpai and Subodh Kumar developed technology for growing nutritious green fodder for animals anywhere to save water and food miles. The research was financed by Ayurved Research Foundation. (Patent Pending)
- Faculty of the Group under the guidance of Dr. Rakesh Goel developed e-learning solutions to learn anywhere-anytime. The solutions are now being expanded.

Where do you see the RKG Group five years from now?

Amassing information and knowledge is not enough, as the same is now available all around the world. Development of skills or capacity to convert information and knowledge into useful marketable service or product is the key to success in the borderless world today.

We would like our Alumni and Faculty to master the art of deploying knowledge in solving technical and societal problems in a minimum time frame.

Raj Kumar Goel Group of Institutions

**Raj Kumar Goel Institute
of Technology
Ghaziabad**

(Rank #2 in B.Pharm, #5 in MBA,
