

SELAQUI ACADEMY OF HIGHER EDUCATION UPCOMING LEARNING CENTER

OM PATHAK
CHAIRMAN

Decade-Old The Gurukul Trust founded by Mr. Om Pathak, a former civil servant and a committed EDUCATIONIST with a rich professional background, is setting new benchmarks in Education by Launching SAHE- SelaQui Academy of Higher Education, an educational institute driven by Passion, Excellence and Innovation.

Mr. Om Pathak is the founder of Delhi Public School Society, Ghaziabad in 1980. He is also the founder of SelaQui International School in 2002, the First International Baccalaureate School in Dehradun - one of the top "fully residential boarding schools" in the country. With our commitment and ethos coupled with hardcore advantages of Infrastructure, Industry Partnerships, and Academic Linkages, all our

stakeholders; students, faculty, industry/employers, academic partners can indeed look forward to a unique, high-quality enriching professional experience with growth in learning, knowledge-creation and personal & business competitiveness.

SelaQui Academy of Higher Education offers admission to selected candidates only in the following streams;

- B. Tech programs in Civil, Mechanical, Electrical, Electronics & Communications and Computer Science Engineering
- MBA/PGDM—2 years full time program
- BBA- LLB—an integrated 5 years program
- LLB—3 years full time program
- B. Ed. — Program in educational research and training

ABES Engineering College ...WE ARE DIFFERENT

DR. SURENDRA KUMAR
DIRECTOR

Every year, as hundreds of students step into the consecrated portals of ABES Engineering College to pursue their professional career, a sense of awe delights them, and not without reason. The college, which has a track record of excellent academic achievement, has yet again emerged as one of the top rankers of UPTU and is way ahead of most of the other professional institutions. In an era where a large number of students are enjoying the benefit of higher education and an increasing number kindle desire to take up engineering and management as their career prospects, it has become increasingly important to select an institution that offer courses and training relevant to both current and future employment in the globalized world. Today the choice & expectations of the students from the technical institutions has changed profoundly; the institutions are therefore required to adjust to the demands of knowledge driven economy, good governance, accountability, quality and cutthroat competitions.

ABES Engineering College lays a lot of stress on the importance of the freedom in the learning-teaching process. Students can't be bound by just an academic approach; they are to be helped to achieve the impossible and reach the zenith of success, we have to let them fly with wings of fire to roar into the limitless sky. This institution started as a dream a few years ago and today we are one of the top-running professional institutions amongst private engineering colleges and have left an indelible mark on the technical educational map of Uttar Pradesh. The main ingredients for quality education are competent faculty, adequate infrastructure, modernized labs and workshops, committed staff, inspiring leadership and overall strategic use of these resources. Wipro

PROF. R.G. MENDIRATTA
(DIRECTOR-ACAD.)

technologies has setup a nodal center in our college under its MISSION 10X program to impart training to the faculty with latest value edition tools for enhancing teaching procedure. Apart from technical education, we at ABES lay enormous stress on extracurricular and co-curricular activities with special emphasis on acquisition of soft skills, communication skills and development of overall personality of the students. Entrepreneurship Development Cell (EDC) funded by AICTE is established in the campus to bring awareness amongst the students regarding entrepreneurship. An MOU has been signed with the Ministry of Micro Small and Medium Enterprises (MSME) for 'Business Skill Development Program' for the students of the college.

We believe that to be a front rank institution it is absolutely necessary that we should develop a strong R&D base. Our activities under this head have been widely acclaimed globally. Our project on Unmanned Aerial Vehicle (UAV) won 2 million Korean Won in the International UAV Competition held in South Korea. A project titled Mini Baja-09 is selected for participation in the final round under SAE project. From whole of India, two projects of ABES are selected for participation in the semi final round of Imagecup.com International Competition organized by Microsoft. We feel proud that in the Aerial Robotic Competition organized by US Army at US Army based Georgia, USA, our project on UAV was ranked among First amongst new entries worldwide. Reaching out to boundaries of learning, we open doors to the students to enter into this institution of repute and chisel them as professionally skilled workforce as per the global standard. We groom the budding technocrats, dynamic managers and buoyant professional for the corporate world, both national and global.
