

LIET offers the following Post Graduation courses

S.No.	Discipline	Total	RMAT / RMCAAT	Mgt. Seats
1	M.Tech. (Elect. & Comm. Engineering)	18	--	--
2	M.Tech. (Mechanical Engineering)	18	--	--
3	Master of Business Administration (MBA)	60	51	9
4	Master of Computer Application (MCA)	60	51	9

■ Eligibility for Admission to 1 year - B.Tech.

The students seeking admission must have qualified one of the combined entrance tests i.e. All India Engineering Entrance Examination (AIEEE) or Rajasthan Pre Engineering Test for Engineering, Architecture and Pharmacy (RPETAP-in the year of admission).

■ Placement

The representatives from around one hundred esteemed multinational national companies across the globe have visited LIET, Alwar for campus interview and to organize training programme for faculty and student. LIET aims at hundred percent placements of the all students by 2010, who have accomplished their technical degree course from this college. The college has released three batches of engineering graduate students, who are employed in glorious multinational companies in India and abroad like Microsoft, Google, Motorola, Ericsson, Accenture, ST Micro Electronics, Infosys Technologies, Tata Consultancy Services, Satyam Computers, Vedanta, Wipro Technologies, L&T Infotech, HCL Technologies, i-flex Solutions, Zensar Technologies, etc. The training and placement department is working with absolute efficiency and has a provision of moderate budget to spend on various activities.

■ Why LIET

- TCS accredited Institute: The first Self financed Engineering college in Rajasthan accredited by TCS for massive On- campus Placement, where seminars are addressed regularly by industrialists.
- Excellent On-Campus Placement: More than 60 MNCs and Indian Giants have visited LIET for campus placements. LIETians are presently working in more than 200 renowned Companies in the country and abroad.
- World-class Infrastructure: Spread over 75 acres lush green land in a safe, peaceful and eco-friendly environment (non-industrial and pollution free) with picturesque surroundings having aesthetically designed and earthquake resistant campus with intelligent building management system conforming to international standards
- Fully Computerized Library: having more than 63,000 text and reference books, CDs & Video Cassettes with DELNET facility (connecting to more than 550 libraries in India housing around 30 lac books and journals) and IELE-journals (under indent-AICTE consortium). All the course books are provided from college library to all the students.
- Luxury and Deluxe Hostels: Seven Hostels for boys and four for girls, accommodating 800 boys and 500 girls inside the campus equipped with three large dining halls and Computer facility with Internet. Students' 90% of the Hostellers are from Delhi region.
- Fifteen Computer labs equipped with 700+ P-IV & Dual Core computers that are connected through LAN with HIGH END IBM DERVERS and 24 hrs internet Facility through 3 MB V-Sat Connectivity.
- Excellent Indoor and Outdoor Games Facilities (TT, Chess, Billiards, Badminton, Basketball, Volleyball, Cricket, Football etc.) besides Yoga, Gym, Swimming and Horse Riding. Huge Auditorium cum Indoor Stadium having a seating capacity of around 2000 persons.
- English Language Lab: Computerized Lab for development of student's

communication skills and personality development. 5000+ students are studying various courses in different Institutions of LIET group.

■ Research & Development

LIET emphasizes on research and development activities in all engineering stream. It encourages astonishing students to involve themselves in bringing up their innovative ideas to reality. Such activities are motivated by the management and research staff group in all aspects.

SOLZBURG ► The Solar Car

LIET's mechanical, electrical and electronics engineering students took an initiative to design, develop and implement the already existing concept of 'Battery Powered Vehicle', using Solar Photovoltaic renewable energy i.e. Solar Photo -voltaic Cells. The innovative idea turned into a unique 3 seater, 4 wheel solar car SOLZBURG, built with inspiring features: light weight, low cost, maximum speed of 50 km/hour, pollution free and noise free drive. It is dually powered that is it can be run by Solar Energy as well as by electric battery chargers. With the rising energy cones, it is import ant to explore avenues of alternative sources of energy. It can be used for intra campus and local transportation purpose with no maintenance and fuel cost. The solar car SOLZBURG was displayed at Sangram 2008.
