Anti-Ageing : Tech Update

Atelier is the first cosmetic plastic surgery clinic in India to be certified by Thermage and is now the first in the entire south-east Asia to introduce Thermage CPT™ & Fraxel re:store dual.

As you age, the collagen in your skin breaks down, resulting in wrinkles and sagging skin. Thermage is a U.S. FDA approved non-invasive technology to tighten the skin on face, neck, hands, arms, thighs, buttocks & abdomen. It is the only U.S. FDA approved skin tightening treatment for eyelids.

Thermage CPT™ (Comfort Pulse Technology™) – the latest innovations –

- Allows treatment with greater energy levels.
- Targets greater tissue volume & deeper tissue layers for more consistent results.
- Thermage CPT™ selectively heats the fibrous septae collagen without damaging the fat. Septae collagen lies just under the skin and when damaged, contributes to a droopy appearance. Thermage heats this layer of tissue effectively and creates a more youthful look.

Only one treatment of **Thermage CPT™** can give you more healthy & youthful appearance for years.

Fraxel re:store® dual system with new Thulium Wavelength is the next generation innovation that addresses pigmentation and other dyschromia on the entire body most efficiently with minimal discomfort & downtime.

Fraxel re:store® Dual : New Features and Benefits -

- Accelerated clearance of hyper-pigmentation as Thulium wavelength more effectively targets superficial skin layers.
- Allows to treat imperfections on both face and body, including hyper-pigmentation patches, acne scars, melasma, surgical scars, stretch marks, wrinkles, aging, and sun damage.

Atelier offers the latest and a complete range of top end Cosmetic Surgery, non-surgical, laser & anti-ageing treatments under one roof
