

COLLEGE OF SCIENCE & ENGINEERING, JHANSI GATEWAY TO QUALITY EDUCATION

College of Science & Engineering (CSE), established in 2002, is an important landmark in the educational map of northern India. Approved by All India Council of Technical Education and affiliated to UP Technical University, the largest technical university of India to affiliate engineering and management colleges, the college offers varied ranges of technical, and management & science courses at undergraduate & post-graduate levels.

In an effort to achieve its aim to set a milestone for the future generation, the institute offers various courses like B.Tech (CS, IT, EC, IC, ME & CE), B.Pharm, B.Sc. (Hons), MBA & MCA.

CSE takes pride in being situated in a serene and salubrious environment on National Highway 75 in Jhansi, the pious land of great warrior queen – Virangana Maharani Laxmibai. International tourist places like Orchha and Khajuraho are in the vicinity. It is also a matter of great privilege for the institution to be situated in Jhansi, which is emerging as an educational hub of Northern India. Again, it is worthy to mention that the Central Government has focused its view on Jhansi, by showing its concern to set up a Para Medical College, and a Central Agricultural University. MLB Medical College, Bundelkhand Institute of Engineering & Technology and Bundelkhand University have already set a landmark.

An outstanding sprawling green 65 acres of campus, passable number of sports fields, a well-planned beautiful lake, a modern cafeteria, state-of-the-art labs, huge online library and a totally Wi-Fi environment are the physical features of this college. Proper living arrangement is an important part of academic success. Keeping this in mind, the Institute has five separate, spacious and

aesthetically designed hostels for boys and girls. An Amphitheatre & Auditorium are in the making, with many more new projects in the pipeline. Rapid growth and development are synonymous with CSE.

Communication skills and personality development have become essential in the competitive world today. Training imparted by Hero MindMine and Professional Communication Laboratory adds to the special features of the institution.

Industry Benchmarked Curriculum, structured to empower the students with essential skills and knowledge, provides employment opportunities in the global market. To ensure this, we have joined hands with some of the industry leaders like HCL, Oracle, CAD Desk, Hero Mind Mine, Global Sequel consulting and many more. It is obviously commendable to mention that HCL made the institution the first choice, when it decided to make its entry in academic field. Case study oriented, holistic teaching methods ensure that the graduates acquire industry acumen and not just a degree. Outbound training is organized on regular intervals helping students to inculcate qualities like commitment, hard work, leadership and team spirit.
