

The Training & Placement Cell of CSE functions independently and is instrumental in arranging campus interviews for placements of students. The Cell makes constant efforts to get our students the best training, summer internship and the final placement, that are in line with their skill set. Over the years, CSE has made strong association with reputed industries, which has resulted into quality placements. Every year, various companies of global and national existence, visit CSE for campus recruitment. Our students have secured placements in reputed organizations like TATA, Wipro, Infosys, TCS, IBM and so on.....

In spite of the tight schedules, constraints and limitations, departmental activities like—seminars, workshops, conferences etc. are executed to provide opportunities for the growth and development of our students, where a common platform is given to interact with industry leaders and scholars of relevant field. Corporate resource centre of the college has built comprehensive network with the corporate world, which provides the opportunity to organize different activities by practicing managers and to make regular visits to corporate houses.

This year the college is sending its meritorious students for industrial visit to Singapore. Needless to say, the purpose of this foreign educational tour is bound to be beneficial to these students by broadening their vision and outlook, giving them a better perspective and opening their eyes to new areas of studies and research.

The college pays special attention to research and innovative techniques. Many students of this college have shown their aptitude for new inventions and innovations. A student of Mechanical Engineering Mr. Abhishek Kumar Singh won the prize from I. I. T. Delhi for his invention—"Refrigerator Without Electricity." Godrej company has offered him a place on a

package of Rs 10 lacs. The same company is also launching soon this product in the market. Another student of the same class Mr. Abhishek Pandeya has been given an award for his invention—"Solar Car" by I. I. T., Roorkee. A third year student of Civil Engineering Department, Ms Ekta Tripathi in collaboration with Mr. Abhishek Singh of Mechanical Engineering Department has been awarded an amount of Rs 40 lacs by B.H.U.I.T., Varanasi to give a practical shape to their project—"Wind-based Automobile Engine." Students of Electronics and Communication Department have been awarded for their invention in Vellore (Bangalore).

CSE has gone one more step forward by announcing financial aid in the form of scholarship "PRAYAS", up to Rs. 11 lacs, which is an endeavour to provide a good platform to meritorious but financially deprived students. The motto behind the scheme is to provide financial assistance, so that those students, who are very keen to pursue technical education but cannot do it in the absence of adequate finances, can realize the dreams of their lifetime through our initiative.

CSE consists of highly qualified, motivated and veteran academicians from institutions of great repute like IIT, IIM & NIT who inspire, encourage and guide the students in all possible ways.

The college is moving fast on the path of progress. Many new courses, such as, M.Tech, P.G.D.M., B.B.A., and B.C.A. are waiting for recognition. Among major projects of the college, an Amphitheatre and an Auditorium are on anvil.

This ISO certified and distinguished institute, keeps all the promises of fulfilling the essential needs to groom the future citizens and to attain the status of Deemed University. The institute realizes its slogan "Your search for excellence ends here!" by ensuring academic excellence and quality education.
