

THE ST. STEPHEN'S PHILOSOPHY OF NURTURING ACHIEVERS PRODUCES STUDENTS WHO EXCEL IN FIELDS ACROSS A BROAD SPECTRUM

INSIGHT

Rev. Dr. B. Jeyaraj, Principal, Loyola College, Chennai

"Just getting a bunch of good students alone does not make you climb up the ladder of success unless you nurture excellence in them."

Society which organises annual lecture series by distinguished scientists. It also runs a forum, the Feynman Club, where students, alumni and visitors present ideas and discoveries in the field of physics.

Well-recognised as the oldest and amongst the most sought after colleges in Delhi, the St. Stephen's philosophy of nurturing achievers has led to the institution producing students who excel in fields across the spectrum. The

college attracts the best in the country, the reason for which Principal Dr Valson Thampu puts as "its shared and treasured heritage," where the students are referred to as "splendid ambassadors," and the college as a "fit instrument to serve the nation with distinction".

Meanwhile, Loyola College, at the second place, feels that excellence does not come easy. Principal Rev. Dr. B. Jeyaraj is unflinching when he speaks of the value additions and the research activities that take place within the ramparts of the 96-acre citadel of excellence. "At Loyola, we look at education differently and it does not lie in the quantification of knowledge, but in the quality of knowledge that helps form the character of students," he says. Since the inception of the Life Sciences Department, studies and research on developmental activities has been the only aim of the students and the professors. Its Entomology Research Institute has been selected to be a partner in the Open Source Drug Discovery, where the first target disease for drug discovery is tuberculosis. The drug will be available in the market in the next two years and
