

TO BE A FUTURE LEADER, YOU DON'T HAVE TO WAIT FOR THE FUTURE.

PRESENTING NIIT UNIVERSITY: THE UNIVERSITY OF THE FUTURE FOR NEW-AGE LEADERS.

NIIT University has been set up to develop Technology and Business Leaders of the future - a new breed of professionals who have deeper industry linkages than ever before, a research mindset from Day One, with education that is seamlessly multi-faceted and enabled by the latest technology. Founded on the core principles of imparting knowledge that is Industry-Linked, Technology-Based, Research-Driven and Seamless, NIIT University offers programs from Bachelors' to Doctoral levels in areas of emerging Engineering Technology from its 100-acre, fully-residential Green campus at Neemrana, near New Delhi.

THE CORE PRINCIPLES OF NIIT UNIVERSITY

Industry-Linked: Meaningful connections with the real world of industry are the hallmark of NIIT University. A case in point is the Mentorship Program™* in our MBA course, where every student is mentored by the CEO of a major corporation and is assured placement by a group of companies#.

Our Industry Practice for undergraduates and Internship Program for Engineering post-graduates ensure rich hands-on experience at the workplace. Furthermore, an Advisory Board comprising of professionals from industry and academia has conceptualised - and regularly updates - the curriculum.

Technology-Based: NIIT University believes in deploying cutting-edge technology in all activities to enhance convenience and sharpen the professional skills of students. All programs cover the latest technological developments to give them a headstart in today's competitive job market.

Synchronous learning technology brings students in every classroom face-to-face with professors and industry leaders from across the world. Extensive computing facilities provide 24x7 wi-fi access throughout the campus. And our online software seamlessly integrates administration, education delivery and assessments.

Research-Driven: NIIT University has designed each program to expose students to the culture of research through specific courses, R&D projects and notably, the Founding Professors' Lecture Series - an innovative concept undertaken by NIIT University.

Immersion in a research culture equips NU's students with a mindset for solving problems across all walks of life. Recruiters value it because this outlook is designed to help our graduates perform better on the job.

Seamless: Seamlessness is an all-pervasive concept that manifests across the NIIT University program structure in several ways. We have multi-disciplinary projects on campus, for instance, where students from Management and Engineering work together. There are also electives from the Engineering courses that MBA students can opt for, thus shaping their own curriculum. In essence, seamlessness means providing students with the occupational, spatial and temporal mobility demanded by today's globalised economy. In addition, courses like Research Methodology and Contemporary Issues bridge a wide variety of disciplines within one single course. Seamlessness thus maximises students' choices and ensures that they receive all-round holistic education with no artificial constraints.

Whether you are a student or an educator, experience the future at NIIT University.

ADMISSIONS OPEN FOR MBA, B.TECH, M.TECH & PH.D PROGRAMS
