

SATYA COLLEGE OF ENGINEERING & TECHNOLOGY

FOLLOW YOUR DREAM

MAHESH KATHURIA
Chairman
Satya College of Engineering &
Technology

SATYA with aim to provide quality Education and to develop in-house Industry compatible Students, SATYA COLLEGE OF ENGINEERING & TECHNOLOGY was established under the aegis of Tungnath Educational Society founded by engineers & industrialists having over more than 20 years of experience in Higher Professional Education and Industry. SCET focus and imparts world class education through practical Inhouse Training supported by periodical industry compatible test besides regular one, setting new benchmarks in Engineering Education to make it a college with a difference. Satya College now become one of the top Institutes in Palwal. The campus is designed acoustically, equipped with modern gadgets and equipments, air-conditioned class rooms, state-of-the-art infrastructure, Wi-Fi connectivity, well equipped labs and Workshop, separate air-conditioned hostel for boys

and girls and also provide buses plying from different parts of Delhi and Palwal. The teaching methodology adopted at SATYA is a balance between academic rigor and exposure to a wide variety of experiences in industry, summer training, case studies and projects combines with classroom teaching and corporate exposure. All activities are well supported and under the guidance of learned faculties like Director, Dr P.K.Dey (IITians), Prof. A.K.Nigam(IITians), Dr Tathagat Ray (University of OHIO and New York) and Dr G.N.Sahay (NIT Patna), Prof. Arnab Bandopadhyay (IITians), besides Mr Tarun Banga, high profile specialist in IT having more than 20 years of experience through GLOBAL corporate like ADOBE, MICROSOFT etc. SCET believes in proactive approach, learning through innovation, to develop creativity and encourage students to identify products and work on Live Problems. Students get on hand experience and vital inputs from regular visits of experts coming from well reputed industries. SCET believes in enhancing inherited potential of students by enriching the curriculum with emphasis on human values, teaching methodology aims to shape our students into mature, goal driven professionals, with creativity & versatility. According to Mr. Mahesh Kathuria, "Our goal is to provide comprehensive, high impact technical & business education and making the students Industry Ready through innovative practices and hands on live industry experience that addresses the need of our business environment and constituencies."

INDIRA GANDHI NATIONAL OPEN UNIVERSITY

Enrollments of nearly three million students and networks across the country making the best use of Information Communication Technology (ICT) – IGNOU's accomplishments are recognised worldwide declared Ms Irina Bokova, Director General UNESCO.

IGNOU is the largest University in the world', according to the UNESCO website: www.unesco.org. "Almost three million students in India and 33 other countries study at IGNOU which is also India's National Resource Centre for Open and Distance Learning and a world leader in distance education. Through its 21 schools of study, 59 regional centres, 2300 learner support centres and some 52 overseas centres, the university offers certificate, diploma, degree and doctoral programmes, comprising around 1500 courses, the university provides access to sustainable and learner-centred education and training to all through quality, innovative and needs-based programmes at affordable costs, thus reaching out to the disadvantaged. It promotes, coordinates and regulates the standards of education offered through open and distance learning in India," quoted the UNESCO Website. The website further announced that, "IGNOU's staff

consist of 380 faculty members and academic staff in headquarters and regional centres while some 36,000 counsellors from conventional institutions of higher learning and professionals from different spheres. With the launch of EduSat in 2004, and the establishment of the Inter-University Consortium, IGNOU has ushered in a new era of technology-enabled education." "Today, there are 134 active video-conferencing centres; all regional, sub-regional and high enrolment study centres have been connected, and exchanges using interactive digital content are possible. Emphasis is currently on developing interactive multimedia and online learning. Using these innovative technologies and methodologies, IGNOU ensures the convergence of existing systems to achieve the goal of ensuring access to Education for All, providing continual professional development and training and promoting integrated national development and global understanding.
